

Internship Report

Jadhav Vishal Nmadev, Bachelor student at Manipal University, India

07.03.-31.06.2011 intern at Chemnitz University of Technology, Germany

As part of the pmIndia Scholarship Programme I got the chance to do a project work at Chemnitz University of Technology. It was 2nd of March and I was so much excited about going to Germany. Finally, I boarded a flight early in the morning and my journey to the Germany started. I landed at Frankfurt airport in the afternoon and I experienced the pleasant and great weather of Germany.

After reaching Frankfurt I started my journey towards my destination Chemnitz by train and it was a wonderful experience for me. At Chemnitz people were waiting for us at the train station and finally I reached to hostel with the help of them. On the next day Ms. Sylvia Strauß helped us with all documentation and registration work needed and I am very much thankful to her for her great help.

On 7th of March our German language course started and I got a chance to meet new people from different countries. That was a very good opportunity to make new friends. Those three weeks of German coaching were really very helpful for me in terms of learning a language. In those three weeks I met different people and got information about their culture, tradition, food etc. It was really a fantastic experience of learning a language, different cultures and traditions in the same class.

I started working on my project in the last week of March. It was a totally different kind of experience for me because I had never worked on any research project. During my project work my guide Dr. Moazzam Ali helped me a lot to improve my knowledge. The work environment was so friendly in the institute and also the staff was very helpful.

In the last week of June I also got the chance to enjoy the fun of “Gautchfest”. This is a tradition of printers in Germany. It was also a totally new experience for me.

So the four months of work and enjoyment in Germany were really an unforgettable experience for me. I got the chance to meet people from different parts of world and got exposed to their culture.

Finally I conclude this article by thanking TU Chemnitz, Manipal University, pmIndia and DAAD for providing such a platform for wonderful experience.
